Re: Fire Department  
(second option)

This proposal is to provide replacement of a failed ductless split hp. The unit appears to have been struck by lightning with holes blown in the copper lines.

Install a 2.5 ton ductless split heat pump to serve the dorm area. The evaporator fan unit would be installed above the drop ceiling in the general location of the existing hp. This would have (3) ducts to spread the air more evenly throughout the space. One of the ducts would serve the shower room area. This includes a crane, new refrigeration piping, wiring, labor & materials.

Cost for this replacement: \$13,228.00

We Propose Hereby To Furnish Material and Labor – Complete In Accordance With These Specification,
